Claude builds you a price list

In one message, and you change it in one sentence

Who it's for:	Anyone who already has a Claude account (don't have one? Guide 1 covers everything).
What you'll have:	A designed price list for your business, ready to send to customers.
What you need:	A Claude account (the free plan is enough) and your list of services and prices.

This is the moment you see that Claude isn't just a chat. It doesn't only answer in words: it builds something real that you can see, change and send.

Your screen may look a little different (for example, the name under the message box, or how the price list card looks). That's fine. These screenshots are from a computer; on a phone everything is in the same order, just arranged differently.

1 Tell Claude what you want

Did guide 2 on a computer? Open your business project (it already has the "Business page" with your prices), and copy this into the message box (1):

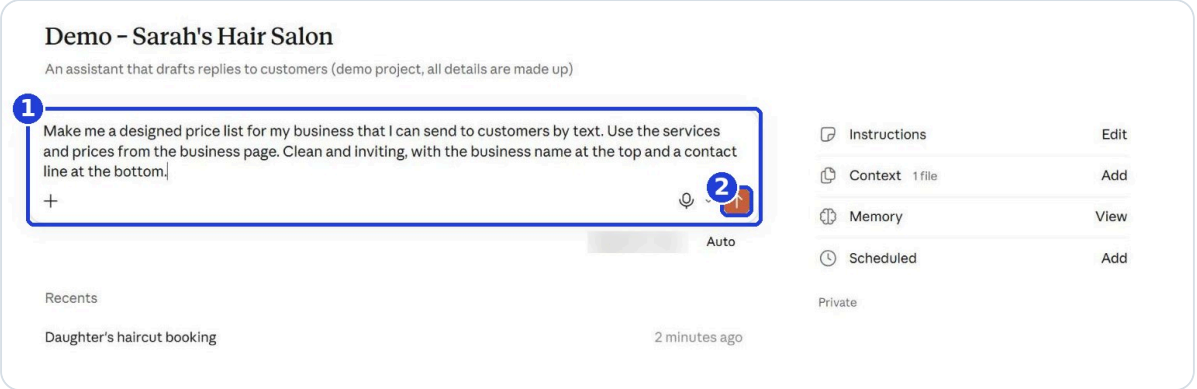

> Make me a designed price list for my business that I can send to customers by text. Use the services and prices from the business page. Clean and inviting, with the business name at the top and a contact line at the bottom.

After you tap "Copy": click inside Claude's message box and paste. On a phone: press and hold in the box, then tap "Paste". On a computer: Ctrl+V (on a Mac: Command+V).

No project yet? No problem. Start a new chat and copy this. Replace what's in the square brackets with your details (and delete the brackets):

> Make me a designed price list for my business, [business name], that I can send to customers by text. Here are the services and prices:
> [paste your list here]
> At the bottom, add: [phone / address / hours].
> Clean and inviting, with the business name at the top.

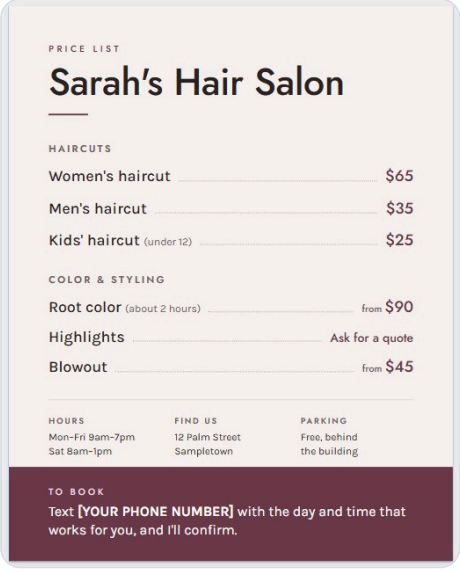

Click the orange arrow (2).

In this example: the "Demo – Sarah's Hair Salon" project from guide 2.

2 Claude builds the price list

When the price list is ready: on a computer, it opens in a design view next to the chat. On a phone, it shows up as a card inside the reply: tap it to open. If it doesn't open by itself, click the card with the price list's name.

This is what Claude built in our example. Yours will look different: Claude designs it fresh every time.

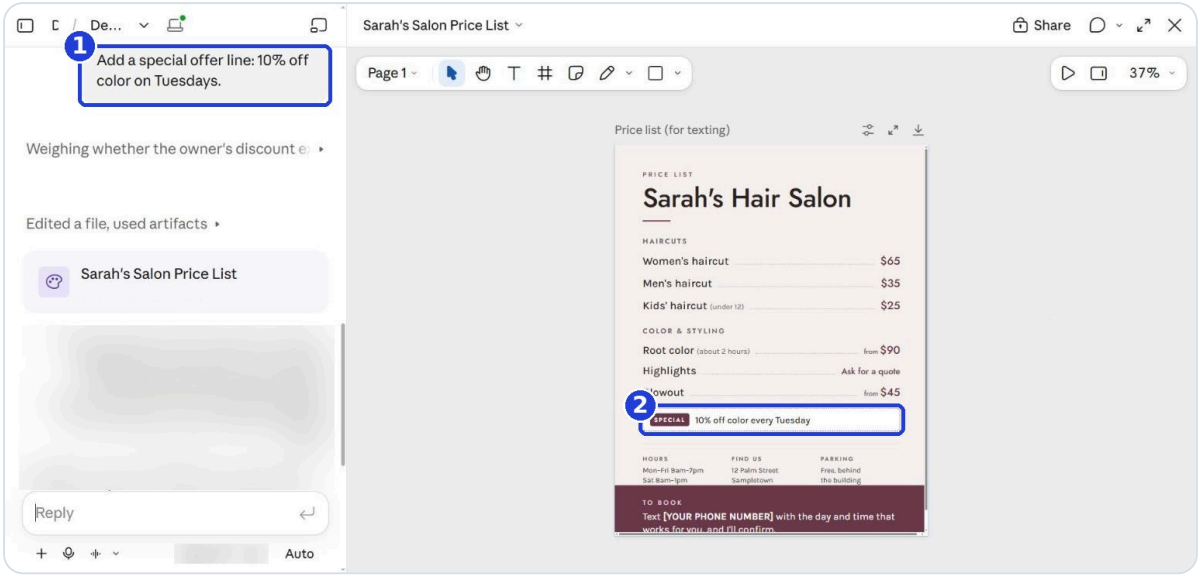

Check it before you send it: Claude takes the prices from what you gave it, but read every line. Missing a detail? Claude leaves a placeholder in square brackets, like [YOUR PHONE NUMBER] in our example. Just write to it: "My phone number is ...", and it fills it in.

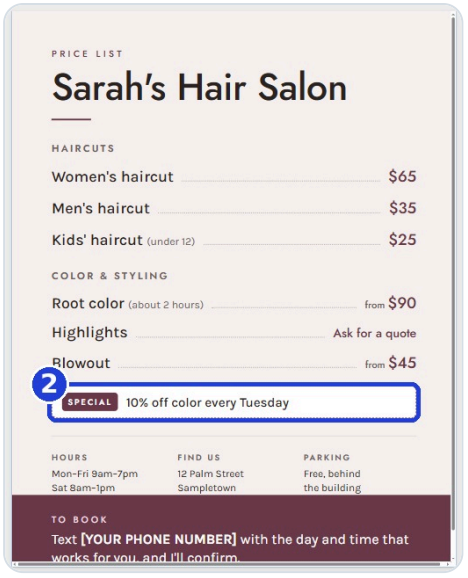

3 Change it in one sentence

Want to add a special offer, change a color or remove a line? Write it in the box at the bottom, like you would to a person. For example (write your own offer in the brackets, or skip this if you have none):

> Add a special offer line: [your offer, for example 10% off color on Tuesdays]

In the screenshot: the request after sending (1), and the offer line added to the price list (2). More examples: "Make it blue and white", "Remove the hours line", "Add a bridal updo for $150".

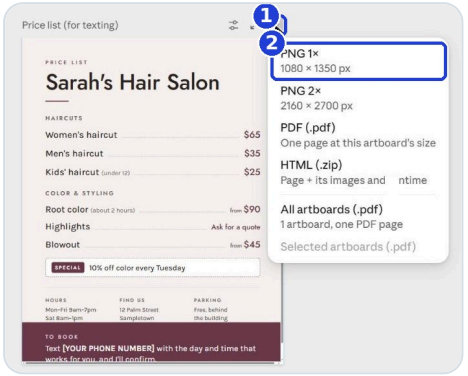

After the change: the offer line was added (2), and everything else stayed.

4 Send it to your customers

Download the price list as an image, and send it like any photo, by text, WhatsApp or email. **On a phone?** Go straight to "No download button?" below.

1. Above the price list, at its top right corner, click the **download button**, the arrow pointing down (1).
2. Choose the first option, **PNG 1×** (2). It's a regular image, sized for phones.
3. If a window asks for permission to download a file, click **Save file**.
4. The image is saved to your Downloads folder (on a phone: in Files or your photos). Send it from there, like any photo.

In this example: the menu that opens after clicking the download button.

No download button, or no PNG option? Your screen may look different, for example on the free plan or on a phone. Then take a screenshot:

- **iPhone:** press the side button and the volume up button together (iPhone with a Home button: Home and the side button).
- **Android:** press the power button and the volume down button together.
- **Windows computer:** press the Windows key, Shift and S together, and drag over the price list with the mouse.
- **Mac:** press Command, Shift and 4 together, and drag over the price list.

On a phone, the screenshot captures the whole screen: tap the small preview that appears, choose "Crop" or "Edit", keep just the price list, then send.

What else can you build this way?

Exactly the same way, just with a different request:

- "Make me a small page for my business with my services, hours and address."
- "Make me a calculator where a customer picks services and sees the total."
- "Make me a special offer card for Instagram."
- "Make me a designed menu" (for a restaurant or a coffee shop).

Keep in mind: Claude designs with text, colors and shapes. It doesn't take or create photos of people or of your business. Want a real photo? Add it yourself.

Claude can make mistakes. Read every price, date and offer before you send it, and don't promise customers anything you haven't decided on.
